

WTP7 Workshop Report

Balancing Risk and Opportunity with Eléna Fourès

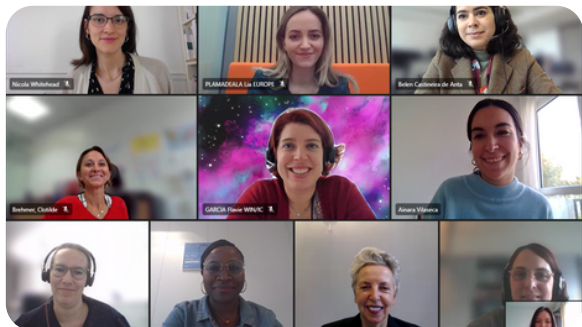

17 November 2022

13:30-15:00 CET / ONLINE

"The perception of risk determines the level of acceptance of risk"

For the seventh workshop of the Women Talent Pool 7th edition, Eléna Fourès, Founder and Executive Coach at IDEM PER IDEM Consulting, drew on her 30 years of experience in the industry to share with our Talents how to understand risk and seize opportunities in order to have greater impact as leaders and in their careers. In her fascinating presentation, she noted how female ambition could often be hindered by limiting beliefs rather than external factors, and stressed the importance of properly analysing risks, including understanding how we are wired and react to different situations; of facing one's fears; and of daring to do and to be!

The presentation was followed by a lively question and answer portion with the Talents, during which they posed a range of questions on topics from self-marketing and self-confidence to overcoming career blocks.
